Engineered to allow body heat and perspiration to escape while maintaining fluid resistance

DURABLE

Using the inherent abrasion resistance of polyester, our garment will last 2-3 times longer than standard cotton/poly blends

Unparalleled Protection

Bio Gardz™ is dedicated to providing professionals with material solutions that deliver the perfect balance between comfort, performance, and protection.

Bio Gardz™ proprietary PPA (Personal Protective Apparel) is engineered to provide professionals with a high-level of sustainable protection and unsurpassed comfort in the workplace. The tightly woven micro-fiber fabric is fluid, chemical, and stain resistant. In addition to these important safety characteristics, Bio Gardz™ PPA garments also contain an antimicrobial barrier, to provide an additional level of protection from dangerous bloodborne pathogens.

Bio Gardz™ Personal Protective Apparel is an accepted form of "Appropriate Personal Protective Equipment" as provided in OSHA 29 CFR 1910.1030(d)(3)(i).
